Draft Opinion 1: Promoting Internet Exchange Points (IXPs) as a long term solution to advance connectivity

Material used to support opinion:
- Tunis Agenda (2005)
- ISOC, OECD, UNESCO report on Internet content, development & access prices (2011)

Member States and Sector Members:
- Promote further development & expansion of networks on national, sub-regional and regional levels
- Enable emergence of IXPs through, inter alia, the exchange of technical expertise and the fostering of supportive policy environments through open multistakeholder consultations
- Promote public policies aimed at permitting local, regional & international internet network operators to interconnect through IXPs

Actions from opinion feed into...
- WSIS+10 review
- PP 2014
- WTDC 2014
Material used to support opinion

- Tunis Agenda (2005)
- Tunis Commitment (2005)
- PP Res 71 (Rev. Guadalajara, 2010)
- PP Res 139 (Rev. Guadalajara, 2010)
- WTPF 2001 Opinion A
- WTDC 2010 Report
- UNGA A/RES/66/184 (2011)
- UN Millennium Development Goals

Draft Opinion 2: Fostering an enabling environment for the greater growth and development of broadband connectivity

Member States to:
Create & promote widespread affordable access to telecomm infrastructure by creating enabling legal & regulatory environments, fair policies, & promoting competition & encouraging private sector investment incentives

Review regulatory frameworks with view to adopting competition-oriented approach

Member States, Sector Members & all interested stakeholders to:
Continue to work, as appropriate, in activities of ITU, & in all international, regional and national forums considering the subject of broadband connectivity, to share best practices re implementation of progressive regulatory regimes designed to liberalize markets, promote competition & stimulate investment

Secretary General to:
Ensure effective implementation of relevant ITU programmes & activities, including WSIS outcomes, through promotion & strengthening of cooperation in development of broadband connectivity

Actions from opinion feed into...

- WSIS+10 review
- PP 2014
- WTDC 214
- Non-ITU hosted forums related to broadband connectivity
Material used to support opinion

- WTSA Res 64 (Rev. Dubai, 2012)
- Work of IPv6 WG (2009-2012)
- Work of BDT & TSB on IPv6
- TSB & BDT joint project to assist developing countries re IPv6 capacity building
- WTPF Opinion 5 (Lisbon, 2009)
- PP Res 180 (Rev. Guadalajara, 2010)
- Work of RIRs, ISOC & other stakeholders in IPv4, IPv6 & capacity building
- ITU IPv6 website
- Report by TSB & BDT directors to ITU Council 2012 on IPv6 allocation & registration

Draft Opinion 3: Supporting Capacity Building for the deployment of IPv6

Member States to:
Consider policies and incentives to promote, facilitate and support the fastest possible adoption and migration to IPv6 within their jurisdictions

Sector Members with web & Internet business to:
Offer their services via IPv6 as quickly as possible

Actions from opinion feed into...

- SG 2 & 3 work on IP addresses
- WTDC 2014
- PP 2014
- WTSA 2016
Material used to support opinion

Draft Opinion 4: In support of IPv6 adoption and transition from IPv4

Member States to:
- Take appropriate measures to encourage, facilitate & support fastest possible adoption & migration to IPv6

Contribute to Council WG on International Internet-related Public Policy Issues on matters pertaining to the Internet & management of Internet resources, including addresses

Member States & Sector Members to:
- Promote affordable IPv6 compliant products & services as quickly as possible

Members States & other stakeholders to:
- According to roles & responsibilities defined in Tunis Agenda para 35, participate in multi-stakeholder institutions responsible for developing technical policy & allocation of IP addresses so their policy priorities can be taken into account

Actions from opinion feed into...

ITU Study Group 2 & 3 work on IP addresses
- ITU WTSA 2016

PP 2014
- WTDC 2014

ITU Council WG on international Internet-related public policy issues
- ICANN, RIR & IETF technical & policy development processes
Draft Opinion 5: Supporting Multi-stakeholderism in Internet governance

Member States and other stakeholders to:

- Explore ways & means for greater collaboration & coordination between governments, international organizations, intergovernmental organizations, private sector & civil society to ensure Internet governance is multi-stakeholder process
- Contribute to Internet governance based on roles and responsibilities as stated in paragraph 35 of Tunis Agenda
- Improve participation of developing country stakeholders in Internet governance

Actions from opinion feed into...

- WSIS+10 review
- PP 2014
- WTDC 2014
- Internet governance processes outside the UN family of organizations

Material used to support opinion

- Tunis Agenda (2005)
- PP Res 102 (Rev. Guadalajara, 2010)
- WTPF Opinion 1 (Lisbon, 2009)
- PP Res 133 (Rev. Guadalajara, 2010)
Draft Opinion 6: On supporting operationalizing the enhanced cooperation process

All stakeholders to:

- Work on the full implementation of enhanced cooperation in Internet governance

Actions from opinion feed into...

- WSIS+10 review
  - Internet governance processes outside UN family of organizations
